The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 59-79 and 91-101 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wolf et al (US 5114492) for the reasons set forth in rejecting the claims in the last office action. The amendments to the claims are not seen to influence the conclusion of unpatentability previously set forth.

Wolf et al teach a composition and process for preparing comprising preparing a caramelized carbohydrate and removing color, wherein the composition is used in foods and beverages such as beer (see entire patent, especially Figure 1).

The claims appear to differ as to the recitation of absorption values, the presence of pyrazine derivatives, and the resistance to light induced flavor changes.

The claimed absorption values, pyrazine amounts, and light resistance would be no more than inherent and/or obvious to that of Wolf et al as the same components and process steps are used.

Applicant's arguments filed December 15, 2010 have been fully considered but they are not persuasive.

Applicant argues that Wolf et al teach additional steps and that Wolf et al do not teach resistance to light induced flavor change.

Applicant does not exclude additional process steps or components of Wolf et al.

The claimed light resistance would be no more than inherent and/or obvious to that of Wolf et al as the same components and process steps are used. Applicant does not define or quantitate the light resistance in the claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
